8. (Deleted)

9. A 2D/3D switching type liquid crystal display panel, comprising:

display image generating means, capable of carrying out 2D display and 3D display, for generating a display image according to input image data;

parallax barrier means for giving a specific viewing angle to the display image in carrying out 3D display, so

switching means for activating and inactivating the effect of the parallax barrier means, so as to switch 2D display and 3D display,

said display image generating means being a transflective liquid crystal display panel including:

a reflective region for performing reflective display;  
and

a transmissive region for performing transmissive display,

the reflective region and the transmissive region being provided for each pixel, and

a diffuser process being performed only in a portion corresponding to the reflective region.

10. A 2D/3D switching type liquid crystal display, comprising a 2D/3D switching type liquid crystal display panel including:

display image generating means, capable of carrying out 2D display and 3D display, for generating a display image according to input image data;

parallax barrier means for giving a specific viewing angle to the display image in carrying out 3D display, so as to obtain a 3D effect; and

switching means for activating and inactivating the effect of the parallax barrier means, so as to switch 2D

display and 3D display,

said display image generating means being a transflective liquid crystal display panel including:

a reflective region for performing reflective display;  
and

a transmissive region for performing transmissive display,

the reflective region and the transmissive region being provided for each pixel, and

a diffuser process being performed only in a portion corresponding to the reflective region.
